

# VacuMove VM160 4644 roll lifter

Project number: 4644 TUBE LIFTER

Lifting steel tubes of different lengths, max 3 m, that weigh about 90 lbs. A low head room system was used to maximise the lifting height. The tubes are moved around the workshop and placed into a wooden crate that is 1 m deep. To be able to lower the tubes with ease the extendable handle is used (project nr 4643) which can be adjusted to suitable length.
